Education

Netaji Subhas University of Technology, New Delhi

Bachelor of Technology in Electronics and Technology with Internet of Things (IoT)

2020 – 2024

Professional Experience

Software Engineer Intern

Eigengram, Remote

Nov 2024 – Feb 2025

- Developed and fine-tuned ML models for structured and unstructured data classification and regression, implementing models like XGBoost, SVM, RandomForest, Naïve Bayes, and KNN.
- Worked on Image Classification tasks using deep learning models such as ResNet and VGG50.
- Implemented AWS services including EC2, S3, and Boto3, automating EC2 instance start/stop using Python scripting.
- Developed and tested front-end features, integrating them into web-based applications.

Software Development Intern

Rovisor Research, Remote

Sept 2023 - May 2024

- Developed, tested, and maintained web applications, enhancing front-end performance by 20%.
- Collaborated on API integrations to improve data flow and user experience.
- Utilized HTML, CSS, JavaScript, TypeScript, and Angular to create efficient, user-focused interfaces.

Web Developer Intern

Business Web Solutions, Remote

Jun 2023 - Jul 2023

- Designed dynamic web applications to improve user engagement and accessibility.
- Optimized performance and implemented front-end improvements using HTML, CSS, and JavaScript.
- Strengthened debugging skills and maintained code quality through best practices.

Technical Projects

Job Seeking Application

Technologies: ReactJS, NodeJS, ExpressJS, MongoDB, JWT

- Built a job-seeking application with a ReactJS frontend, achieving a 20% performance boost.
- Optimized data-fetching with React Router DOM 6, enhancing speed by 5-10%.
- Secured backend with JWT-based authentication, increasing server performance by 5-6%.

QuickBites (Food Ordering WebApp)

Technologies: Node.js, Express.js, MongoDB, JWT

- Developed a full-stack app for food ordering, featuring JWT-based secure authentication.
- Created a RESTful API and an admin dashboard for managing food items and orders.
- Improved data handling and retrieval for large datasets, ensuring smooth operations.

Technical Skills

Languages: C++, C, Python, JavaScript, TypeScript, SQL, Node.js

AI/ML and Data Processing: Machine Learning (XGBoost, SVM, Random Forest, KNN, Naive Bayes, Linear Regression), Deep Learning (CNN, ResNet, VGG50, Transformer fine-tuning - Gemma, Qwen2-VL-2B), Image Processing, Text Extraction (OCR), NLP, Structured and Unstructured Data Processing

Frameworks & Libraries: ReactJS, Angular, Express.js, OpenCV, scikit-learn, PyTorch

AWS Services: EC2, S3, Boto3 (Automated EC2 instance start/stop using Python)

Database: MongoDB, MySQL

Tools: Git, Jira, Docker, Colab, Jupiter

Coursework: Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, DBMS

Achievements

Problem Solving: Solved 320+ questions on GeeksforGeeks and 250+ on LeetCode; achieved a 1500 rating on CodeChef.

Academic Excellence: Scored 98.2 percentile in JEE Mains, ranking among the top candidates.
